

CBRN Level 3	Introduction: This course is designed for students to learn how to operate CBRN equipment within the CBRN environment.		
	Students must have done Level 1 and 2		
No of Students: 15	Location: At customer's location	Level of Skill: Level 3	Course length: English: depends on equipment to be taught

This course can be in different formats – it can be the full course or can be broken down into small modules

This course is a continuation from the level 2 course where the students have learnt to be operators; the Level 3 course takes that knowledge base and takes it further by getting the student to apply their knowledge into practical situations and hostile operations enabling them to carry out the tasking safely and with minimum risk to individuals or groups.
