Belec Compact Port HLC
Mobile Spectrometer for Metal Analysis

Belec Compact Port HLC Mobile Spectrometer for Metal Analysis

Technical Data

Optics

- double spectrometer in Paschen-Runge mounting using the latest 6GSO-System (6th Generation Spectrometer Optic System)
- Rowland circle diameter 300 mm
- usable wavelengths 190-410 nm
- Zeiss-Grating with 3600 lines/mm
- reciprocal dispersion 0,9 nm/mm (1st order)
- shock resistance
- high-speed photomultipliers for perfect carbon analysis and determination of h- and l-alloyed steels
- temperature stabilized detectors with wavelength depending configured entrance window (US-licensed)
- integrated noise compensation

Belec Compact Port HLC

(Hybrid Low Carbon)

World's only Portable Hybrid-Spectrometer for Perfect Carbon Analysis in Combination with Maximum Flexibility and Latest 6GSO-System

Sparking Probes

- argon-flushed sparking probe for exact analysis, including C, P, S and N^{*}
- argon flow 0.11/min in standby and 2.5 l/min during analysis
- argon control on probe plug, independent from instrument
- air probe for quick mix-up checking
- adapters for wires, pipes and small parts available for all probes
- lightweight shockproof plastic probe housing
- start an clear buttons easily hand-operated
- signal on mix-up identification: visual display for "repeat" and "reject", start button is blocked until confirm button is pressed
- multi fibre quartz optics, standard lengths 3m to 8m*
- low-wear tungsten electrode
- silver electrode for air probe
- probe connector system
- adapters available for different sample types as wires, tubes or small parts
- customized adapters on demand

Source

- sparking generator with maximum 400 Hz frequency
- unipolar discharge
- separate parameter for pre-sparking and integration selectable via software
- ignition frequency program specifically selectable via software
- discharge power program specifically selectable via software
- arc source for air probe, optional
- ignition voltage 20 kV

temperature stabilization, at 0.1°C exact

- mounted on multichannel board, coupled by high-speed USB port
- integrated noise suppression
- integrated background compensation
- unlimited numbers of measuring channels, configurable for several bases

Dimension:

– width	16.5 in. (420 mm)
– height	7.9 in. (200 mm)
depth	19.3 in. (490 mm)

Weight

— analysis unit	37.5 lbs.(17,00 kg)
UV probe	3.9 lbs. (1,75 kg)
— argon probe	2.9 lbs. (1,30 kg)
air probe	1.8 lbs. (0,80 kg)

Power Supply

- 230V/50Hz or 110V/60Hz
- 100W in stand-by mode
- 600W during analysis

Computer Hardware

- system-integrated industrial computer system
- Intel[®] Atom[™] Processor N270 (1.60 GHz)
- 1 GB RAM (max. 2 GB)
- 2.5" hard disk 60 GB minimum
- 10.4"TFT colour display
- touch screen
- special dust and moisture protected keyboard integrated in hinged lid
- 3x USB 2.0 ports
- ethernet interface

*optional

Documentation Made Easy

Our software Belec WIN 21 convinces its users: easy to handle, always up-to-date and best operation conditions by clear arrangements. Measuring values and statistics are displayed at the touch of a button and can then be printed out or archived.

The analysis values can easily transmitted in a local network via Ethernet connection.

Belec WIN 21 Analysis and Quality Control Program

- arbitrary operating system, e.g. MS Windows XP
- Remote-Service-System
- display of analysis values at each measurement
- as many analysis programs to customer specifications as required
- individual analysis parameters for each program
- automatic program selection (APF)
- analysis computation with: background correction, curve position correction, additive and multiplicative inter-element correction
- automatic correction with standard types
- easy and simultaneous recalibration of several programs
- mix-up checking by comparison with reference measurement
- grade checking by comparison with analysis
- type calibration and type measurement
- tolerances for every analysis program and element in absolute and relative weight percentages, individually adjustable
- average and standard deviation from chosen measurements
- warning signal, when calibration curve is exceeded
- automatic reminder of regular recalibration
- automatic display of quality description or material number
- alloy data bank, 100,000 qualities and more storable (only limited by computer storage capacity)
- text size on monitor variable for optimum legibility
- protocol storage function
- report memory function for later analysis, printing and archiving
- several statistic functions with graphical representation
- automatic profiling system

Subject to technical modifications
